

AgOS Planning – User Guide

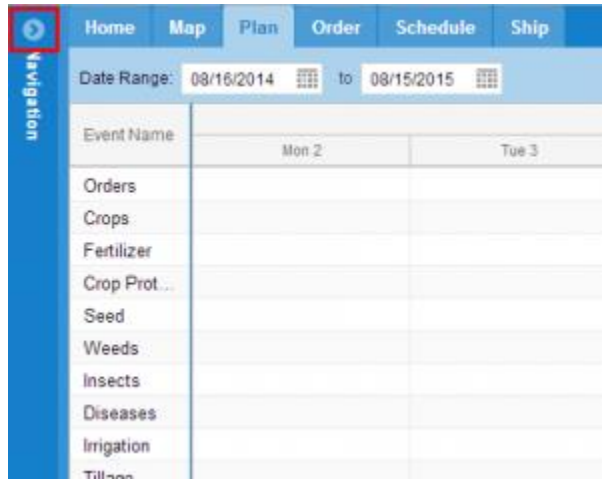

1. From the **Home** page, click on either the **Plan** tab or the **Plan** icon.

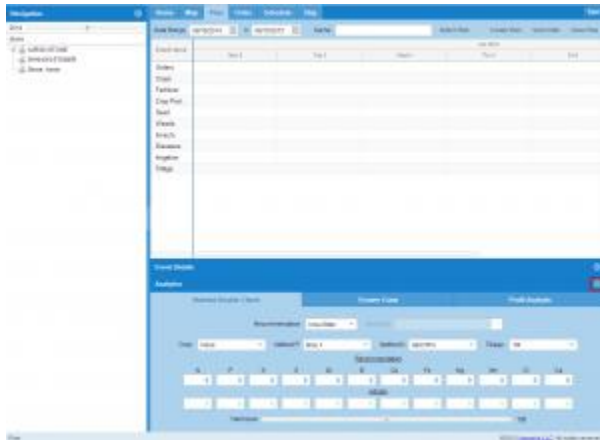

2. On the planning page, begin typing the name of your grower in the search box in the Navigation section on the left to filter the list of available growers.

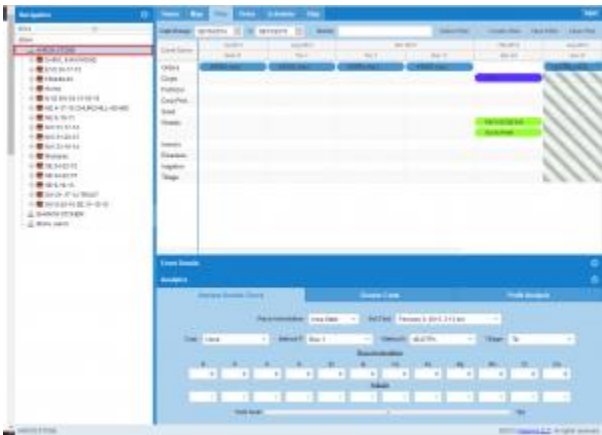

- Click on the arrow if you need to expand the Navigation window.

- You may collapse the Analytics information by clicking the arrow on the right-hand side of the Analytics bar.

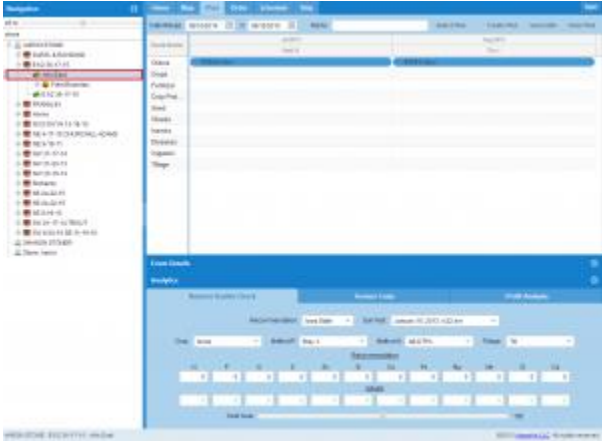

- 3. You can create your plan by grower to include all farms and fields. Click on the grower name expand the list of farms for the plan in progress.

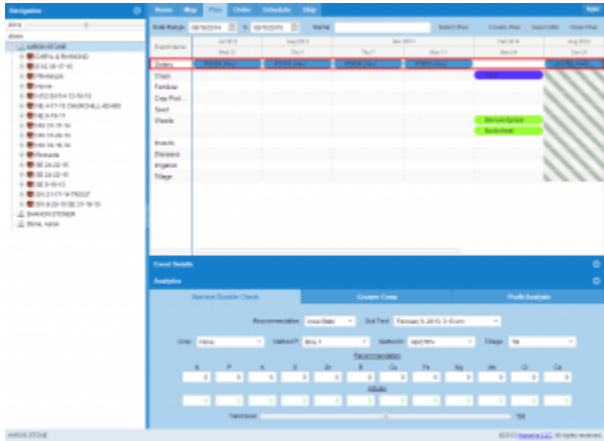

- 4. You may also create your plan by farm. Click on the desired farm to expand the list of fields for the plan in progress.

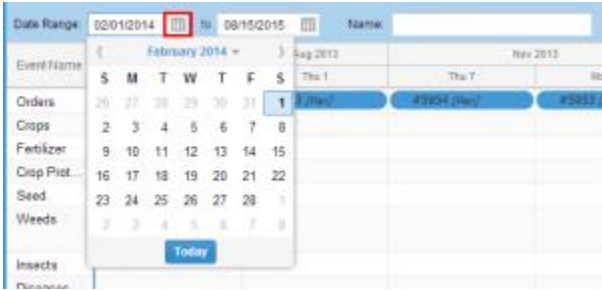

5. You may also create your plan by field. Click on the desired field.

- For this lesson, we will create the plan by grower Aaron Stone.
- The Orders will populate in the planning time-line, and the activities will display below the fields in the Navigation tree.

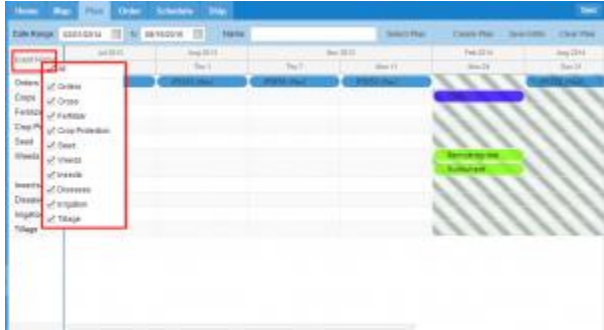

6. If desired, you may modify the date range for your plan. (The date range will default to the customer’s fiscal year.)

- The Events within the date range are identified with green diagonal lines.

- Right-clicking on **Event Name** allows you to filter the events to be displayed.

- Right-clicking on the **Orders** header (directly below **Event Name**) allows you to filter Orders by class, e.g. Recommendation, Plan, Active or Done.

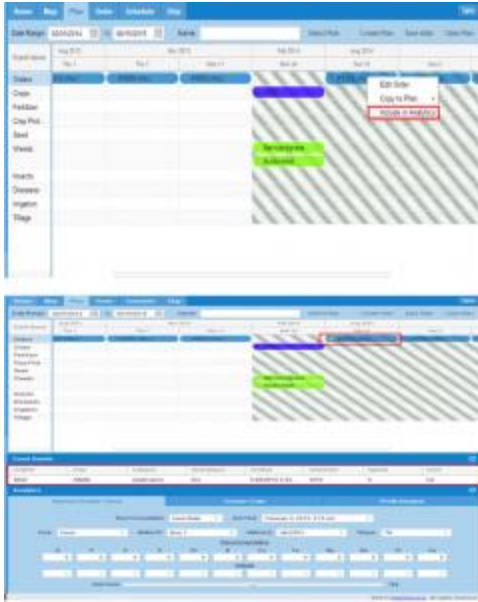

7. Right-clicking on the Orders will give the customer the option to:

Edit Order:

- Selecting **Edit Order** will take you back to the Order page, allowing you to modify the Order.
- Include Order in Analytics:**
- This option will include the selected Order in the current analytics. The customer will be able to view the Order in relationship to other Orders in the plan. Included Orders will be identified with a green checkmark.

- To remove an Order from analytics, right-click on the desired Order and click “Exclude from Analytics.” The green checkmark will no longer appear.

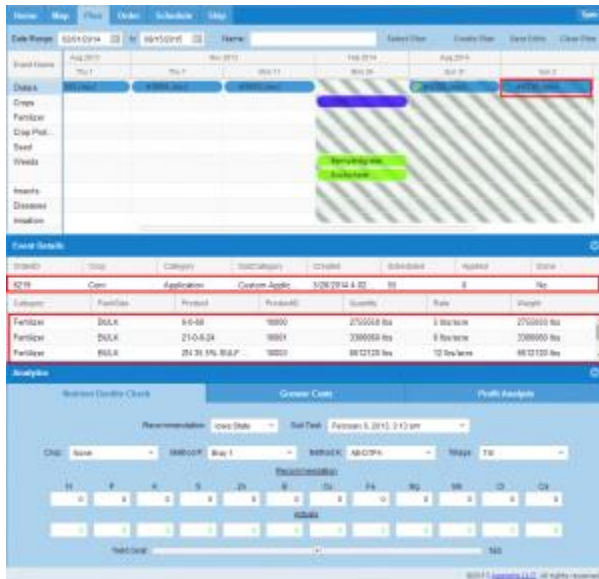

Copy to Plan:

- This option will allow you to copy an Order to your plan. Enter the target date you desire to utilize the Order and click **OK**.

- Clicking on the Order will give a preview showing the event details of the Order.

- If you elect to remove the Order from the analytics, simply right-click on the checked Order and click the **Exclude From Plan** option.

- Name the plan. Although the created plan will have an ID number, the name a plan feature makes it easier for the customer to identify it, associate it with other plans, or reference it for future plans.

9. If at any point before the plan is created you wish to discard the work in progress, click the **Clear Plan** button. Once your plan is created, it can be edited, but it cannot be deleted.

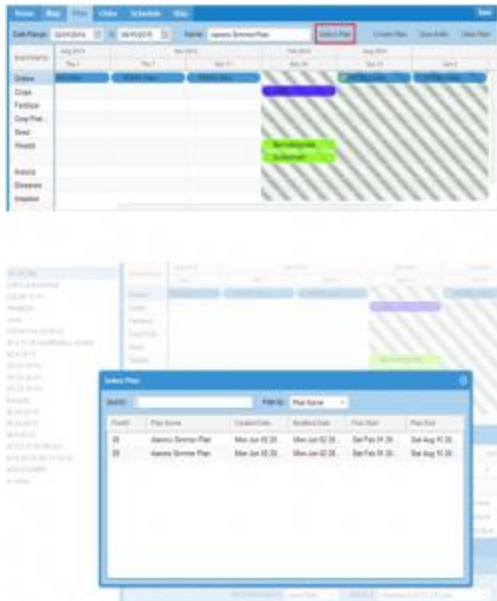

10. Once your plan is completed, click the **Create Plan** button.

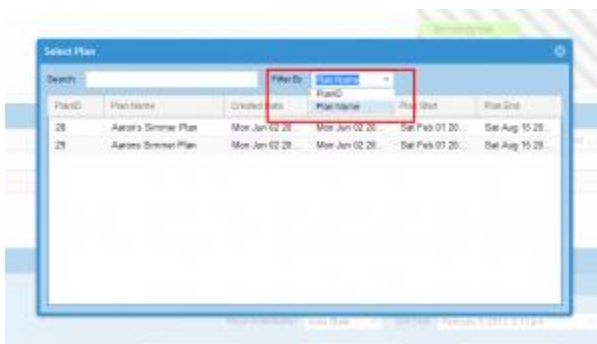

- You will receive a notification that your plan has been saved.

11. To view your saved plans or to edit a plan, click the **Select Plan** button.

12. In the **Filter By:** drop-down menu, search for your plan by **Plan Name** or **PlanID**. For demonstration purposes, **Plan Name** will be used.

13. Type the plan name in the search field. When your plan name appears, double-click on it to view the plan. Once the plan is visible, you may edit it if needed.

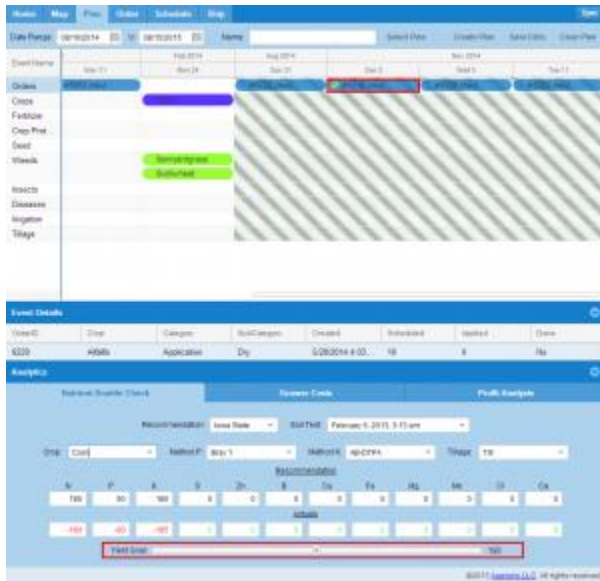

14. When you have finished editing your plan, click the **Save Edits** button.

- You will receive a notification that your plan has been saved.

- The Recommendation numbers will vary dependent upon the Yield Goal set per acre. The yield goal can be set by using the slider at the bottom of the page.

16. Grower costs will give the customer a cost breakdown of Orders included in the analytics.

- Order costs will be broken down by category.

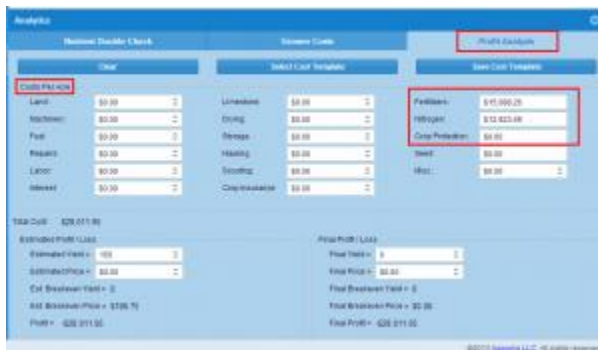

17. Profit analysis can be shown by Grower, Farm or Field.

- If Grower profit analysis is selected, (as in this lesson) the profit margin is shown for events included in the analytics.
- If Farm or Field profit analysis is selected, the profit margin will include the acres for each farm or field.

- The **Estimated Yield** can be modified in the **Profit Analysis** tab. Any modifications will automatically be adjusted in the **Nutrient Double Check** tab.

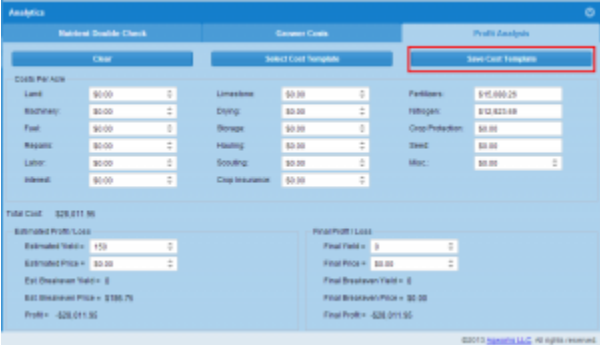

18. Under **Costs Per Acre**, **Fertilizers**, **Nitrogen** and **Crop Protection** are automatically included in the analysis. All other category information must be manually added by the customer.

19. Click the **Clear** tab to clear all information.

20. Click the **Save Cost Template** to save the entered information for use on another farm or field.

- Select a name for your template and click **OK**.

- More than one template can be saved. **The Select Cost Template** tab will allow you to choose the needed template.
